- **First Contact Physiotherapist** – Our PCN physiotherapist Hayley Standell offers physiotherapy and also is qualified in the administration of joint injections.

CQC Statement of Purpose May 2026

Our practice ethos is to strive towards a partnership between patients and health professionals based on the following key facets:

Mutual Respect

We endeavour to treat all our patients with dignity, respect and honesty. Everyone at The Revel Surgery is committed to deliver an excellent service. We ask all patients to highlight any discrepancies and to offer the same commitment in return.

'Holistic' Care

We treat 'patients' and illnesses. This means that we are equally interested in the physical, psychological and social aspects of your individual care.

Continuity of Care and the 'Therapeutic relationship'

Building and maintaining a strong relationship between doctors, health professionals, and patients is essential to the way we work. This is especially so in the management of ongoing problems or long-term illness. In these circumstances we would encourage you to continue seeing the same health professional and wherever possible we will facilitate this through our appointments system. However, if you have a new problem, the doctor or nurse that you normally see is not available, or you would like to see someone else then we would encourage you to see any of the doctors or nurses at the practice.

Learning and Training

We believe in "life-long learning" and all the health professionals here and administrative staff undergoes an annual appraisal where learning and development needs are identified. We also recognise the benefit of supported learning for our patients and families in enhancing your ability to manage and deal with both 'self-limiting' and long-term illnesses

Community Links

The Revel Surgery strives to continue to develop links within the community. The practice works closely with volunteer drivers to provide patient transport to and from the practice. This is funded by The Friends of Revel Surgery charity which raises funds on behalf of the practice to help provide this service in addition purchasing equipment for the practice and the local community.

The Revel Surgery also has a very active Patient Participation Group (PPG). We meet and engage with the group at regular intervals, which is beneficial to the patients and surgery alike. PPG are involved in helping run health campaigns, promote the practice positively, and also give valuable patient feedback on various topics, which is helpful in meeting and delivering our high standards for patient expectation.

Open List

The Practice has an open list policy and accepts patients who are resident and newly resident in the defined practice area, surrounding the village of Brinklow.
